

27 April 2022

To Whom It May Concern,

I have been working with Kyle Skipworth and the team at Power Solutions Tasmania as our electrician since the setup of our business in 2018. His experience, dedication and high standard of work has meant that we are able to rely on him for all aspects of electrical work at our rapidly growing business. When we've needed assistance for our electrical requirements at the distillery, he has always been just a phone call away and at the site within the hour if required, which we have at times.

His strong communication skills always make working with him constructive, and he always ensures that we get the outcome that we need. He is always honest with us about timeframes and always delivers the outcome we are after. Examples of this include the installation of new power outlets to improve distillery processes along with the overall upgrade requirements of the building's electrical grid.

As Kyle's business has developed, he has grown busier with his specialty skills in high demand. With this being said, Kyle always makes the time for what we need and we are greatly appreciative of him finding this time and delivering our requirements in a courteous and timely manner.

Yours sincerely,

Tarrant Derksen  
Director  
New Norfolk Distillery
